PROFILE

Product Manager and business builder with 10 years of experience across enterprise SaaS, product strategy and operations. As KNOW's sole Product Manager, independently identify opportunities, shape investment recommendations and turn complex customer needs into reusable platforms and commercial offerings. Combine hands-on UX, prototyping and AI validation with cross-functional delivery, owning products through launch, adoption and continued evolution.

EXPERIENCE

KNOW — September 2021 - Present

Product Manager

Frontline operations platform spanning operational workflows, learning, communication, scheduling, insights and asset management.

- **Reusable Forms platform.** Evolved Forms into configurable workflows used by 200+ customers, handling approximately 200 million responses annually. Served as a primary entry point for approximately 50 customers and supported expansion into other modules, with reusable capabilities spanning checklists, handovers, permits and audits.
- **Commercial Insights.** Selected an existing visualization platform and built the prototype for a paid custom-reporting offering. Standard and customized Insights together serve almost all 200+ customers, replacing recurring report preparation with configured views. Shape pricing and ongoing investment around customer value and delivery effort.
- **Robin assistants.** Personally prototyped, validated and led launch of mobile Robin for frontline policy and SOP retrieval, adopted by 50+ customers, and dashboard Robin for operational queries, used by 20+ customers. Assess mobile answers using successful-query records and satisfaction feedback.
- **AI image verification.** Prototyped, validated and launched a capability used by 50+ customers, processing approximately 1-2 million responses monthly with 95-98% accuracy against human-reviewed samples. Across several deployments, daily review staffing fell from four employees to one periodic reviewer, while coverage expanded to previously unchecked submissions.
- **Multilingual AI workflows.** Shipped voice-driven form completion and AI-assisted form creation. In customer-validated deployments, completion of 200-300-question forms fell from approximately four hours to under 30 minutes; complete workflow configuration fell from approximately a day to up to one hour. Tested Tamil, Hindi and Telugu; Arabic is used in customer deployments.

EXPERIENCE CONTINUED

KNOW | Product Manager | Continued

- **Evidence-led prioritization.** Prioritized learning lifecycle improvements over an enhancement with less certain demand. Shipped content updates, recipient visibility and completion tracking within one managed course structure, reducing manual reconciliation; competing work was deferred.
- **Customer solutioning.** Challenged a requested attendance change using historical usage evidence. The customer piloted and adopted an existing capability instead, while the original setting remained unchanged.

KNOW **September 2019 - August 2021**

Product and Operations

- **Team development.** Built and led a four-person customer delivery and product operations team, establishing training, shared OKRs, responsibilities, performance measures and development expectations.
- **Cross-functional execution.** Coordinated Engineering, Design, QA and customer-facing teams, strengthening delivery capacity to support customers across Southeast Asia, Australia and India.

KNOW **September 2017 - August 2019**

Generalist - Product, Operations and QA

- **Zero-to-one ownership.** Owned Forms and Issues from discovery through prioritization, UX, engineering coordination, testing and rollout. Launched both modules during this period and continued their evolution in subsequent roles.
- **Market opportunity.** Investigated unmet scheduling needs through customer and sales-pipeline research, informing the case for shift management in retail and F&B.

Crayon'd **March - August 2017**

Business Analyst

- **Discovery and delivery.** Translated discovery into specifications and user flows across restaurant discovery, taxation, e-commerce and fundraising products; coordinated stakeholder reviews and release quality with engineers and designers.

Stealth startup **September 2016 - March 2017**

Business Analyst

- **Early product exploration.** Explored an inventory-management product through market research, customer interviews and assumption validation. Built customer-specific business solutions using no-code platforms.

EDUCATION AND DEVELOPMENT

Kumaraguru College of Technology

B.E., Electronics and Communication Engineering | 2012 - 2016

Product Academy Fundamentals | McKinsey & Company | 2022

Hardware and embedded-systems prototyping at iQube, 2013 - 2016; Bosch trainee, May 2014.

COMMUNITY

Organizer, ProductTank Chennai; mentor to students exploring technology careers.
